Office Action Summary	Application No. 10/658,744	Applicant(s) MIYAMOTO, AKIHIKO	
	Examiner Andrea M. Ragonese	Art Unit 3743	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Oath/Declaration

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.
2. The oath or declaration is defective because it does not properly identify the foreign application for patent or inventor's certificate on which priority is claimed pursuant to 37 CFR 1.55, and any foreign application having a filing date before that of the application on which priority is claimed, by specifying the application number, country, day, month and year of its filing. Specifically, the date corresponding to foreign application 2002-306451 should be correctly identified as October 22, 2002, not October 10, 2002 as it currently states.

Drawings

3. Figures 7-9, 15 and 16 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Art Unit: 3743

4. The drawings are objected to under 37 CFR 1.84(t) because the pages lack proper numbering. Each sheet of the drawings should be numbered in consecutive order. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

5. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

6. The abstract of the disclosure is objected to because it contains improper sentence structure. The abstract should contain complete sentences, not one run-on sentence as it currently contains. Correction is required. See MPEP § 608.01(b).

7. The disclosure is objected to because of the lack of a required section: Brief Description of the Several Views of the Drawing(s) as set forth in 37 CFR § 1.74. Each individual drawing must be listed separately with a description of that particular view of the invention. If a figure contains several parts, for example, figure 1A, 1B and 1C, the figure may be described as figure 1. See MPEP § 608.01(f). Appropriate correction is required.

Art Unit: 3743

Claim Objections

8. **Claim 2** is objected to as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The phrase "for winding up a finely powdered drug" is vague and indefinite because the accepted meaning of the verb "winding" does not seem to properly correspond to its intended meaning in the claim language. Appropriate correction is required.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

10. **Claims 1-2** are rejected under 35 U.S.C. 102(b) as being anticipated by Ligothe et al. (US 6,427,688 B1). Ligothe et al. discloses a dry powder **40** inhaler **60** with a whistle **75** for making a sound when the inhalation is properly done (column 7, lines 32-45), as shown in Figure 7.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kistler (US 4,291,688), Sackner et al. (US 4,484,577), Dwork (US 5,522,380), Sagstetter et al. (US 5,957,125), Watt (US 6,578,571 B1) and MacRue et al. (US 6,644,305 B2) all disclose inhalers with whistles.
